# Coastal Carnival Developer Log

This week we finished our first pass of the game and posted it to itch.io. The first pass is playable, however we caution the game is not bug tested. The game is full of glitches and bugs to the point that it's practically unplayable. The current game's state functions as more of a preview of our models and mechanics than a fleshed out game. We hope you enjoy this first look!

Comment

This is so awesome!!!
